Enthusiastic software developer with experience in full-stack development, AI/ML, data analytics, and cloud technologies. Skilled in .NET, Node.js, Python, and Java, with hands-on experience in building web applications, machine learning models, and analyzing data. Familiar with AWS, DevOps tools, and modern development practices, with a strong eagerness to learn and grow.

EDUCATION

Master of Computer Applications – Pursuing | CGPA (1st year): 8.88 (2024-2026)

Bachelor of Computer Applications – D.V.S College of Arts & Science | CGPA: 8.63 (2021–2024)

PUC – PPC College Admar | 72% (2019–2021)

SSLC – Amirta Vidyalayam | 72.96% (2018–2019)

TECHNICAL SKILLS

Programming – Angular, .NET, Python, Java, C, C++, Node.js

Web Development – Django, HTML, CSS, JavaScript, Spring Boot

Cloud & DevOps – AWS (EC2, Lambda, Amplify), Git, Linux, Ansible, CI/CD Pipelines, Kubernetes

AI / ML – TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, Pandas, NumPy

Data Visualization – Power BI (DAX, Power Query, Dashboards), Matplotlib, Microsoft Excel

Database – MySQL, MongoDB, SQLite

Tools – VS Code, Eclipse, NetBeans, Jupyter Notebook, GitHub, Google Colab, Git

SOFT SKILLS : Time Management, Communication, Team Collaboration, Eagerness to Learn.

INTERNSHIP EXPERIENCE

Web Development Intern – Digisnare Technologies LLP

Worked on web development tasks as part of the internship training program.

Gained hands-on experience in understanding project workflows and professional development standards.

Web Development Intern – Innovant IT Solutions, Shimoga

Built and optimized a web application using PHP, MySQL, HTML, and CSS, focusing on backend logic and UI improvements.

Java Full Stack Intern – KodNest (Remote)

Built modules using Spring Boot + MySQL and implemented REST APIs.

Learned debugging techniques and code versioning with Git.

PROJECTS

Spam Email Classifier (Machine Learning) – Achieved 96% accuracy using Python + Scikit-Learn.

Hand Gesture Drawing App (OpenCV) – Created a virtual drawing canvas using Mediapipe

hand-tracking. **Food Ordering Web Application (Python / Flask / MySQL)** – Built a dynamic web app enabling users to browse menu items, add to cart, and place orders.

Medicine Chatbot (Python) – Interactive chatbot for answering medicine-related queries using rule-based NLP.

Virtual Calculator (Python) – GUI-based calculator supporting basic math operations using Tkinter.

Invoice Automation(Django) – Created a Django-based invoice automation system to streamline billing and record management.

CERTIFICATION COURSES

Artificial Intelligence – INFOSYS

Data Science And Analytics – HP

Power BI – Simplileran

AWS EC2 – AWS SKILL BUILDER

Python – GUVI

JavaScript – GUVI

Java – GUVI

LANGUAGES – Kannada, English, Telugu, Hindi, Tamil
